Menu Name:

Save Menu

To create your first custom menu, give it a name above, then choose items like pages, categories or custom links from the left column to add to this menu.

After you've added your items, drag and drop to put them in the order you want, and click each item to reveal additional configuration options.

When you're finished building your custom menu, make sure you click the Save Menu button above.

You can create multiple menus. [Statement re default theme menu.] You can also display custom menus using the new "Custom Menu" widget.

For more information on this feature, see the Custom Menus article in the Codex.
