

# Improving WordCamp.org Tools

## Result Details

Question	Answers	Skips
05 Is there anything that would benefit you more than those 4 projects?	27 44%	34 56%

Advertising for sponsors. In our WordCamp [city redacted] theme we have a big problem with the sponsors, the sidebars widgets banners have a link to the sponsor Post Type and they as to link directly to their site or promo site, that was very very problematic to solve, so what we do?, crapy solution, copy all html code generated by the theme and paste into a text widget with different link.  
The theme solve all event necesities but not at all sponsors necesities and they are key feature of a WordCamp.  
ie: they ask sometimes to be inside the emails, would like to have more than one banner, what to sponsor a talk or session or track.

126,228,460 It would be nice to create ticket reports using different filter in addition to the whole report.

126,192,055 Thursday, May 21st  
3:32PM

126,191,663 For the WordCamp [city redacted] themes I am building, I'm lucky to have great designers to work with and I would love to be able to build their designs as complete themes and submit them for inclusion in the WordCamp repo so that other organizers can use them. The needs of an event website are so different than a blog, having a few custom themes that are built just for this purpose would be a great base for everyone to be able to use.

Thursday, May 21st  
3:22PM

126,188,212 Can't think of anything.

Thursday, May 21st  
2:32PM

126,186,828 The ability to add custom PHP (page templates, custom widgets, whatever...) a la WordPress VIP. We don't need more themes, just the ability to do custom code in the current themes.

Thursday, May 21st  
2:18PM

126,132,441 no

Wednesday, May 20th  
6:04PM

126,111,002 Better email marketing capabilities and analytics on attendees. The ability to trigger transactional emails to attendees based on purchase, discount codes, etc.

Wednesday, May 20th  
12:10PM

126,108,338 It was not mentioned, but typically its the functionality, not the design that becomes the biggest issue, and it wasn't addressed here at all. The registration and ticketing systems were bad, and the ability to communicate clearly through automated emails was really bad. The ability to use external resources was banned. THIS was the primary reason we had huge struggles during the process of getting our site and event going properly.

Wednesday, May 20th  
11:22AM

126,107,826 Nope, it's been a while since I've done anything on a WordCamp site so it's tough to say.

Wednesday, May 20th  
11:23AM

126,074,200 Have some more dev-centric options. Cowboy-Coding on a live site is no good practice. E.g. some easy way to clone the site for a local install.

Wednesday, May 20th  
3:34AM

126,050,952 Ability to add javascript

Tuesday, May 19th  
4:22PM

126,046,771 As mentioned, stop limited organizers who are responsible to build out WordCamp sites. Allow them to build using the tools they want.

Tuesday, May 19th  
2:59PM

126,042,686 Support for unique themes and/or child themes, instead of being locked into a limited selection.

Tuesday, May 19th  
1:51PM

126,036,412 Custom themes.

Tuesday, May 19th  
12:10PM

<a href="#">125,787,222</a>	Locking and revisioning the Jetpack CSS. Ability to better edit footer and make additional widget fields.	Tuesday, May 12th 7:06PM
<a href="#">125,623,227</a>	I had phases where I felt a bit lost setting up the site and I also was afraid to "break things". The Vagrant setup of the meta environment that Ian Dunn provides via Github made it much easier. It would have been great to know of that from the very beginning on. A workflow chart that explains how you develop the site from the initial newsletter form over creating your own styling, adding organizers, sponsors, speakers and finally tickets would be great. (Including shared data such as the speakers show up when you set up sessions.)	Friday, May 15th 1:00AM
<a href="#">125,578,433</a>	Child themes :)	Thursday, May 14th 10:49AM
<a href="#">125,069,945</a>	A quick and simple way to give feedback when building wordcamp sites so that we can collect pain points as they happen.	Thursday, May 7th 8:24AM
<a href="#">124,952,191</a>	The cloning project, coupled with a better CSS editing experience, would be the best solution by far. Being able to clone any existing WordCamp site and then edit the CSS easily (via SVN) would be the 100% best solution for us.	Wednesday, May 6th 12:51AM
<a href="#">124,948,373</a>	-	Tuesday, May 5th 11:05PM
<a href="#">124,946,273</a>	Better forms. Embedding Google forms for speakers, volunteers, sponsors, etc. is lame. It would be slick to have a real form building option on the site where users could purchase their tickets, be given dynamic options, auto-register on the site, etc.	Tuesday, May 5th 10:14PM
<a href="#">124,934,515</a>	Nope	Tuesday, May 5th 6:12PM
<a href="#">124,930,935</a>	Ability to upload/import files/templates.	Tuesday, May 5th 4:55PM
<a href="#">124,927,100</a>	Documentation would be very helpful, however some veterans may overlook it since they've been here before. Some may not realize new feature(s) have been added since the last time they configured a site.	Tuesday, May 5th 3:38PM
<a href="#">124,927,062</a>	Some kind of version control for multiple theme editors. Or a way to keep a copy of the theme tweaks in Github.	Tuesday, May 5th 3:47PM
<a href="#">124,925,887</a>	Nope, those projects hit my problem spots.	Tuesday, May 5th 3:30PM
<a href="#">124,925,624</a>	More customization of themes and use of jQuery	Tuesday, May 5th 3:26PM
