### Questions

Below are a few scenarios you may encounter as a community organizer. What would be a possible solution to the following questions or comments:

1. Hi my name Jane Joe Doe and I have a plugin I developed and would really like to demo the plugin at your WordPress event. I have 5 free licenses that I can give away to attendees is this something I would be able to do?
2. Hello, my name is Jamie Doe and I'm working on a small event I'm planning to post to our meetup group and am looking for feedback. I'm also part of a women's in tech group that is looking to a WordPress specific event. Can I post a meetup that is specific to women on the WordPress meetup group?
3. Hey there, Jonny Bing here, I was at the last meetup event, it was good, but the speaker didn't cover what I was hoping for. I heard about this speaker from Ding Town WP who is amazing at this topic. I contacted Ding Town about speaking and they asked for \$100 to speak. I'm good to pay them as type of sponsor what is my next step to create the event on meetup?
4. I'm contacting you anonymously because I was approached in the parking lot after meetup by an individual who was aggressive. I'm not sure what to do. I want to come back to the next meetup, but this person was too creepy. I can tell you their name if you like, but I'm just not sure what to do because the community is supposed to be all inclusive.

## **SECTION: WHAT INCLUSIVE, WELCOMING LOCAL COMMUNITIES DO FOR THE WORDPRESS PROJECT (FROM SHERIE BETH)**

What can an organizer do to help foster an inclusive environment where everyone is welcome at the table?

Why is it so important to build a 'local, face-to-face' community, as opposed to relying exclusively on online communication as a means of building community?

**SECTION: WHAT INCLUSIVE, WELCOMING LOCAL COMMUNITIES DO FOR THE WORDPRESS (KIM WHITE-- APPARENTLY THEY BOTH DID THIS ONE!)**

1. What is a reason a person could feel left out or not willing to participate in a group?
2. Why is it important to make WordCamps and meetups safe and welcoming?
3. What would be a way you could help give someone a voice who would not usually speak up?
4. As an organizer why is it important to understand your local community?
5. How does inclusion help the WordPress and open source community?

**SECTION: THE (OPEN SOURCE) REASONS BEHIND THE RULES**

If a member of the community were to ask you why tickets to your WordCamp are not free, what is the primary reason you would give them for the cost?

One of your meetup attendees mentions to you that they work at a local church who would love to host the next WordCamp - do you take them up on their offer? Why or why not?

Is it better to choose a WordCamp organizer with lots of experience and resources who lives in another city or someone who lives in and uses WordPress within the local community... explain why?

Why is it so important that organizers, speakers, sponsors, and volunteers adhere to the 100% GPL software requirement (if they are distributors or promoters of such software)?

If the lead WordCamp organizer you are mentoring expresses a desire to create their WordCamp website on their own private domain in order to "really show the power of WordPress", how would you respond to that and why?

You are mentoring a local WordCamp and the lead organizer decides the best way to get lots of interest and high attendance at their first WordCamp would be to invite several high-profile, and non-local speakers to their event. Would you discourage this and what reasons would you give?

When mentoring a new organizer, why is it important to emphasize that they shouldn't aim for perfection at the expense of inclusion? What are the consequences of a WordCamp running too perfectly?

What can happen if unwelcoming behavior is allowed to occur at a WordCamp without the Code of Conduct being enforced by the organizers?

## **SECTION: THE OPEN SOURCE TOOLBOX: COMMON PROBLEMS, UNCOMMON SOLUTIONS**

Here are some scenarios that a community organizer may run into. Write out your suggestion to the organizer about how you would handle the situation, being sure to explain "why" you are suggesting that particular approach.

1) There is a member of my local meetup who is very frustrated with the lack of meetings in her part of the city, but I'm not able to lead meetings there due to the commute - how should I handle this?

2) We are pretty frustrated with our WordCamp organizing right now and are considering cancelling due to lack of an appropriate venue. We've tried everything and just aren't sure where else to look. What should we do?

3) We've got everything set for our WordCamp but just don't have the right talent on our team to make it "look " professional. We can't just march forward with a generic look and feel for our WordCamp can we? Won't it look badly and keep people from participating if we don't look as professional and amazing as WordCamp AwesomeCity?
