

Get Involved with WordPress!

SUPPORT

Answer questions to help other WordPress users in the support forums and IRC.

Pro tip: Start with easy ones and learn as you go!

DOCUMENTATION

Responsible for all documentation, including the Codex, handbooks, developer.wordpress.org, HelpHub, admin help, inline code docs, and more across the WordPress project.

TRAINING

Create lesson plans and materials for free in person WordPress workshops.

COMMUNITY

Bring people together with events like meetups and WordCamps, and work on outreach initiatives for diversity and new contributors.

SPEAK & SHARE

Share what you've learned with others: speak at events and teach at workshops.

TV

Help with moderating incoming video content, post-processing, and transcribing/subtitling videos.

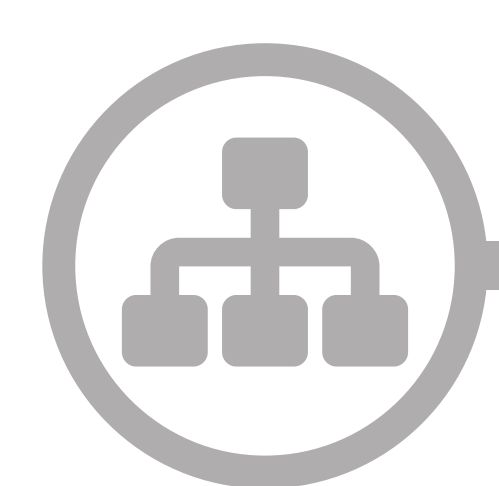

THEMES

Review incoming theme code to help keep our directory in great shape.

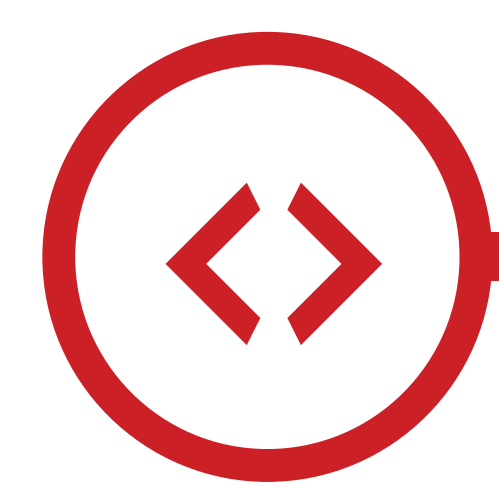

PLUGINS

Keep the plugin directory safe by reviewing code.

META

Develops official websites like WordPress.org and WordCamp.org.

CORE

Contribute to the software that powers a bunch of the web.

Wanted: Enthusiastic practitioners with skills in code, testing, design, ux, and mobile.

ACCESSIBILITY

Make WordPress core and bundled themes accessible and usable for everyone.

POLYGLOTS

Translate WordPress core, plugins, themes, and apps.

DESIGN

Help design and develop the user interface for WordPress; a home for designers and UXers alike.

MOBILE

Help build the iOS and Android apps for WordPress.

Wanted: UX experts, testers, designers, with Java, Objective-C, or Swift skills.

MARKETING

Help us develop the materials and resources to market the WordPress software and community.

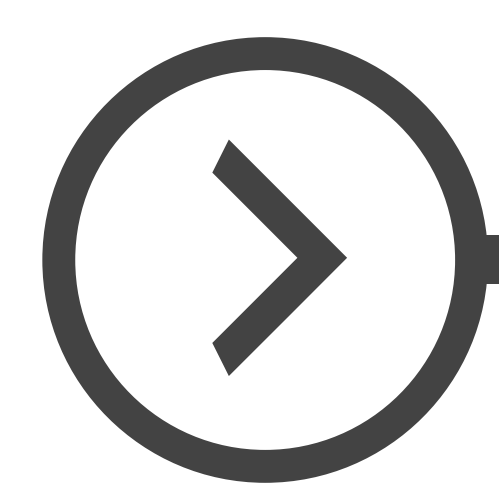

HOSTING

We work together on hosting best practices and tools for the community.

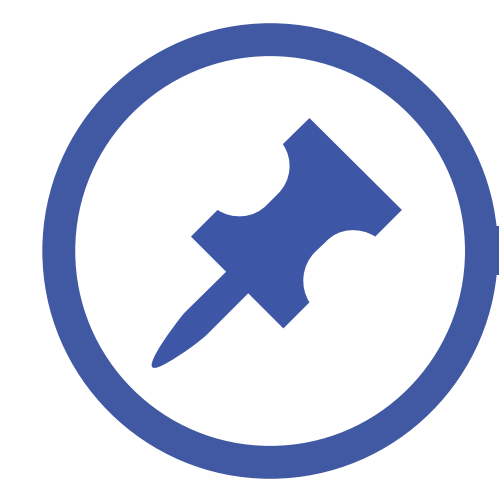

TEST

Help patrol, test, and curate the WordPress experience via QA, testing, and user research.

CLI

Contribute to WP-CLI, the official command line tool for managing your WordPress site.

TIDE

Tide is a series of automated tests run against every plugin and theme in the directory and then displays PHP compatibility and test errors/warnings in the directory.
