Permissions

Select an user you want to change permissions:

E-mail or Username

- All Projects `$user->add_cap('validate_all_translations');`
- WordPress**
 - Development, Administration, Network Admin
 - Default Themes `$user->add_cap('validate_translations');`
- bbPress** `$user->gp_projects = [1, 3, 4]; // User Meta`
- BuddyPress**
- GlotPress**
- Browse Happy**
- Rosetta (WordPress.org)**
- WordCamp Base Theme**
- WordPress for iOS**
- WordPress for Android**
- WordPress for BlackBerry**
- WordPress Plugins**
- WordPress for Windows Phone**

- * Select an user of the site (autocomplete)
 - * User needs to be added to the site first, subscriber at minimum
- * Allow user to validate all projects
- * Allow user to validate only specific projects
 - * Do we need per sub-project permissions too?
- * Replace role with two new caps
 - * validate_all_translations
 - * validate_translations + user meta to store project IDs

Badges

- * Not more than two!
- * One for team, one for translator/validator
 - * Fill background of the other, same as badge-theme & badge-theme-reviewer
- * User shouldn't have both?

Team

- * All Leaders
- * Added by Sam manually

Translator / Validator

- * SQL Query `Grab users with validate_all_translations/validate_translations cap`
- * Runs once per day?
- * Store as user meta?
- * Only approved translations
- * Include activity? (see WP_Credits)
- * User needs X translations to get the badge
- * Can be done automatically
- * Badge = BuddyPress Group
- * API not available
